

### 3.1.2 Rules for non-fiction

You may need a separate bib for non-fiction items that are different due to any one of the following:

- **Format (Paperbacks may be attached to hardcover bibs.)**
- Publication date
- Publisher
- Page **Number count**
- Illustrator
- Introduction

You do need a separate bib for non-fiction items that are different due to any one of the following:

- ~~Format~~
- Edition
- Translator

#### ~~Note for classics or paperbacks~~

~~You may err on the side of attaching to an existing bib if the primary content matches.~~

#### **Note for print on demand works**

Print-on-demand titles are printed from a master as they are ordered, rather than printed in a traditional run. A print-on-demand title will often have the current year as a date that may not match an existing bib record. Attach a print-on-demand title to an existing bib if the only difference is the date.
